

Contagious Diseases and Parasites

NOTIFICATION

A parent, legal guardian, or other person or agency responsible for a student shall notify the student's Principal if the student has any medical condition which is defined by the Cabinet for Health and Family Services in administrative regulation as threatening the safety of the student or others in the school. The notification shall be given as soon as the medical condition becomes known and upon each subsequent enrollment by the student in a school.¹

The Principal or designee shall notify the student's teachers in writing of the nature of the medical condition.

INFECTION CONTROL

If any student is known or suspected to have or be infected with a communicable disease or condition for which a reasonable probability for transmission exists in a school setting, the Superintendent may order the student excluded from school. The time period the student is excluded from school shall be in accordance with generally accepted medical standards which the Superintendent shall obtain from consultation with the student's physician, the local health officer¹, or the Kentucky Department for Public Health.

CONTROL OF LICE IN SCHOOLS

School personnel shall actively pursue the prevention and control of pediculosis capitis (head lice) in the District's schools. Control procedures for incidences of live head lice have been developed and shall be followed for each case.

EPIDEMICS

In the event of a dangerous epidemic as determined by the Kentucky Department for Public Health, the Board may close the schools.¹

SCHOOL TO REPORT

Local school authorities shall report immediately all known or suspected cases of communicable disease to the local health department. Diseases to be reported shall not include those considered confidential, such as HIV/AIDS, as set forth in Kentucky Administrative Regulation.²

MEDICAL CONFIDENTIALITY

Unless otherwise permitted by law, signed parental consent designating District personnel to be informed of a student's medical condition shall be on file prior to informing identified District personnel.

The Superintendent shall identify which employees are to have access to student medical information. This determination shall be made on a need-to-know basis.

CLEANUP PROCEDURES

The Superintendent shall develop procedures to promote adequate and proper cleanup details and measures to aid in the prevention of infection and communicability of contagious diseases.
